NOTES:												
1 All weights are shown in pounds unless otherwise stated												
2 Payload is rounded to the nearest 10 lbs. Payload = GVWR - Base Wt.												
3 Optional equipment weight for HD (> 8500 lbs of GVWR).												
4 If not already included in the EPA options. This is the weight of the entire trailer tow package, not just the hitch.												
5 Payload and maximum trailer weight are mutually exclusive.												
6 GCWR is a defined value from Vehicle Development in lbs												
7 Per SAE regulation (SAE J2807) GCW = Base Weight + EPA Options + Trailer Pkg Weight + Max Trailer + 400 lbs (Passenger + Driver+ Optional Equipment)

NOTES:											
1 All weights in pounds unless stated. Payload and Max Trailer values are rounded to the nearest 10 lbs.											
2 Payload = GVWR - Base Wt.											
3 Payload and maximum trailer weight are mutually exclusive.											
4 GCWR is a defined value from Vehicle Development in lbs.											
5 Max Trailer= GCW - Base Weight - 170 lbs (Driver weight + 20 lbs. Optional Equipment).

NOTES:												
1 All weights are shown in pounds unless otherwise stated												
2 Payload is rounded to the nearest 10 lbs. Payload = GVWR - Base Wt.												
3 Optional equipment weight for HD (> 8500 lbs of GVWR).												
4 If not already included in the EPA options. This is the weight of the entire trailer tow package, not just the hitch.												
5 Payload and maximum trailer weight are mutually exclusive.												
6 GCWR is a defined value from Vehicle Development in lbs												
7 Per SAE regulation (SAE J2807) GCW = Base Weight + EPA Options + Trailer Pkg Weight + Max Trailer + 400 lbs (Passenger + Driver+ Optional Equipment)
